RIVERSIDE RECREATION

SANDERS COUNTY

Sanders County covers a diverse area. Spanning 130 miles of the lower Clark Fork River valley in Northwest Montana, the county consists of forested valleys and mountain ranges on the west end and open grasslands towards the east. Thompson Falls, the county seat, lies in the west central portion of the county. While areas of western Sanders County receive in excess of 36" average annual precipitaion, locations near Niarada and Lonepine may experience less than 10", making them fairly arid. The agricultural and natural resource base of the area

follows a similar pattern. Traditional farming and ranching communities occupy the eastern third and a mixed small farm or logging economy is found towards the west. Within close proximity are Glacier National Park, the Ross Creek Giant Cedars, Flathead Lake and Lake Pend Oreille. This quiet portion of Montana with its lush green Valleys, rugged mountains, lakes and streams offers a lifestyle of tranquility away from the centers of large industry, congestion and pollution.

MONTANA RANCH LIFE

MONTANA WILDLIFE

Sharing our land with the wildlife is a Montana standard. You can expect elk, deer, moose, bear, montain lion and a host of other natural inhabitants. The elk will begin bugling, setting the stage for their mating season every fall. The music created is a rare treat. Calving in the spring brings opportunities to share a young elk's first awkward steps. Wildlife viewing trumps any sitcom.
